

Blue Green Corridors Map Notes

The Blue Green Corridors Map is based upon the following information:

Flood Water Map, 2019, Environment Agency;

Cornwall Wildlife Trust (CWT) information taken from the Cornwall Wildlife Resource Map, 2018, The Environmental Records Centre for Cornwall and the Isles of Scilly (ERCCIS);

Public Rights of Way and selected Local Green Space information, 2019, Cornwall Council Interactive Mapping.

The Blue Green Corridor Area is formed from the Medium Probability Flood Zone (probability of river and sea flooding, ignoring the presence of defences as supplied by the Environment Agency) and the Flood Water Map (for surface water as supplied by the Environment Agency). “The Flood Water map is intended as indicative area of search for interventions that will help manage flood water in the future. Actual flood flow route potential should be assessed in the event of a development proposal coming forward in any of these areas.” (StARR Project, Environment Agency, 2019).

The Blue Green Corridors Map, the Flood Water Map and the Cornwall Wildlife Resource Map are all available on the Maps page, NP section of the Parish Council Website.
